

MUSLEH-UR RAHMAN

Eskendar Ali Biswas Road, Radhanagar, Pabna Sadar, Pabna, Bangladesh
+880-1760-928867 — rahmanmuslehu0@gmail.com — [LinkedIn](#) — [GitHub](#) — [Portfolio](#)

Objective

Detail-oriented Data Science and Analytics professional with expertise in machine learning, statistical modeling, and interactive dashboard development. Seeking to leverage Python, SQL, and Power BI skills to deliver actionable insights for data-driven decision-making in business intelligence or analytics roles.

Education

Masters in Applied Statistics and Data Science Jahangirnagar University
Relevant Coursework: Advanced Statistical Modeling, Data Visualization, Machine Learning

B.Sc.(Hons) in Statistics Khulna University
Relevant Coursework: Regression Analysis, Hypothesis Testing, Probability

Skills

- **Programming & Querying:** Python, R, SQL, DAX
- **Libraries/Frameworks:** Pandas, NumPy, Matplotlib, Seaborn, Scikit-learn, TensorFlow, ggplot, Caret
- **Analytics & Visualization:** Power BI, MS Excel, Google Sheets, Power Query
- **Database Tools:** SQL Server, MySQL
- **Core Competencies:** Data Cleaning, Feature Engineering, Machine Learning, Forecasting, Statistical Modeling

Projects

Bank Customer Churn Prediction – Python [View Project](#)

- Performed exploratory analysis revealing key churn drivers: age, balance, and number of products.
- Customers aged 45+ were $2.1\times$ more likely to churn; 31% churn among €100k+ balance vs. 9% for zero-balance.
- Multi-product users (3–4 products) showed $4.8\times$ higher churn risk.
- XGBoost achieved best performance (AUC-ROC: 0.872, PR-AUC: 0.534).
- Feature importance: Age (24%), Balance (19%), NumOfProducts (17%).

Hospitality Management Dashboard – Power BI [View Project](#)

- Developed KPI-driven dashboard integrating multiple data sources via Power Query.
- Created advanced DAX measures and slicers, improving reporting efficiency by 25%.
- Implemented tooltips and calculated columns to support strategic decision-making.

College Student Database – SQL Server [View Project](#)

- Designed relational database with DDL/DML operations, joins, subqueries, and CTEs.
- Developed analytical queries to generate academic performance reports.
- Optimized query performance for efficient retrieval and reporting.

Courses and Certifications

- [Python for Data Science, AI & Development – Coursera](#)
- [Data Analytics and Power BI Career Path – Interactive Cares](#)
- [SQL \(Basic\) – HackerRank](#)
